Results-driven Frontend Engineer with over 5 years of experience building scalable, high-performance web applications using React.js, TypeScript, and modern UI frameworks. Proven track record of improving application speed, reducing bugs through migration to TypeScript, and leading front-end modernization efforts. Experienced in mentoring developers, driving best practices with tools like React Query, Storybook, and Jest, and collaborating across teams to deliver user-focused solutions. Passionate about clean architecture, performance optimization, and creating maintainable codebases that scale.

Work Experience

Software Engineer • Springworks

November 2021 - Present | Remote, India

- Led frontend development for a Business Management platform, delivering new modules and revamping existing features to improve usability and client satisfaction.
- Migrated legacy ReactJS codebase to the latest version, improving performance and reducing build times by over 25%.
- Converted entire frontend stack from JavaScript to TypeScript, reducing runtime errors and improving developer productivity.
- Integrated modern tools like React Query, Storybook, and Jest for state management, documentation, and automated testing, enhancing code quality and speeding up feature delivery.
- Mentored and managed a team of 5 interns, conducting code reviews, task estimation, and providing technical guidance in React and TypeScript best practices.

Software Engineer • Techwarelab

October 2019 - November 2021 | Kochi, India

- Architected and developed responsive, production-grade frontend applications using React.js, Angular 2+, and Ionic, delivering web and cross-platform mobile apps end-to-end.
- Designed and implemented component-based UIs and REST API integrations for multiple domains including travel booking, food delivery, CRM, and social media management platforms.
- Migrated several legacy AngularJS projects to React.js, improving performance, maintainability, and scalability.
- Collaborated with Alibaba engineering team to develop a bus booking web app, focusing on UX optimization and robust API handling.
- Mentored two interns in modern React best practices, Git workflow, and frontend architecture patterns.

Education

CAS IHRD Karthikappally

BCom with Computer Application • 2016 - 2029

Skills

- Primary Frontend : React.js (Core Stack), TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, Jotai, React Hooks, Context API
- Frameworks & Libraries : Angular 2+, React Native (Basic), React Query, Framer Motion, Styled Components, Chakra UI, Material UI, Reactstrap, SEO Optimization
- Testing & Quality : Jest, Unit Testing, Integration Testing, Storybook (Component Documentation), CI/CD Principles
- Backend & Database : Node.js (Personal Projects), MySQL, MongoDB, RESTful APIs
- Tools & Version Control : Git/GitHub/GitLab, Linux, Figma, JIRA/Agile Methodologies

Languages

- Malayalam - Native
- English - Professional
